THIS SYSTEM entirely obviates the necessity of extracting teeth, does away with artificial teeth, prevents the suffering caused by decay of the teeth, and consequent extraction of the roots (producing a change in the expression of the face and mouth), and avoids the pain and excessive annoyance of a plate.

By this method roots and badly decayed teeth which are firm in position may be restored to perfect usefulness and beauty, performing the office of mastication like the natural teeth.

IF BUT FOUR (or more) roots or teeth still remain in proper position we can attach an ENTIRE SET of teeth to them, restoring the expression, comfort, and usefulness without the use of a plate.

These operations are comparatively painless: are PERMANENT NATURAL.

usefulness without the use of a plate.

These operations are comparatively painless; are PERMANENT, NATURAL, and CLEANLY, and those who have worn artificial teeth, and had this operation performed, testify to the cleaner, cooler feeling of the mouth, the restoration of the sense of taste, and their ability to thoroughly masticate food, with added comfort and increased health.

The crown work is a perfect and beautiful imitation of the natural teeth. It is most comfortable there being no plate covering the reaf of the mouth.

most comfortable, there being no plate covering the roof of the mouth, so that after a few days there is nothing to indicate that the patient has not his or her own natural teeth. It is the most cleanly work, as every part can be easily reached with a brush, and the highly polished surfaces of gold and porcelain are without difficulty kept free from deposits, and performs the office of mastication like the natural teeth.
